Subject: RE: Docket EPA-HQ-OPPT-2019-0501 - UPDATE

Amparo,

I've been unable to confirm that I can begin uploading files for this docket. My understanding is that they will be posted on the OPPT website sometime tomorrow so I believe I will be able to begin uploading documents in the morning.

I believe the Federal Register will publish sometime early next week (not certain of the date yet).

Thanks.

Steve

Subject: RE: Docket EPA-HQ-OPPT-2019-0501 - UPDATE

Amparo,

Just wanted to provide an update regarding the documents for the subject docket:

The program has advised that they are shooting to have all the supplemental files loaded onto OneDrive by mid-morning tomorrow. However, I believe there will be additional review before I can upload them into FDMS. The main risk evaluation document is not expected until late tomorrow.

With respect to the number of documents, page count, and other characteristics, the program noted the following:

- Asbestos is a “small” RE [Risk Evaluation] – a little less than 300 pages (much less than TCE – 750 pgs)
- We have a total of 12 files (10 supplemental plus the charge and RE)
- None of the supplemental files are zip files; 2/10 are excel files

I hope this helps with your planning.

Thanks.

Steve

Amparo

We anticipate the need for a fast turn-around posting to the subject docket this week. This docket is for the April TSCA SACC meeting on OPPT’s draft risk evaluation for Asbestos. The posting should be similar to other SACC meetings in terms of number of documents and page count.

I just received notice that the Federal Register is ready for signature (FRL 10006-93). I believe they were requesting publication on Thursday.

We’ll try to begin getting documents today so we can load them into FDMS to start your review.

Sorry for the short notice. I’ve been very focused on this week’s all-virtual meeting of the SACC (which begins at 10:00 today).

Please let me know if you have any questions.

Thanks.

Steve
